

REIG  JOFRE

Pharmaceutical Technologies

Business Unit 2025

A European leader in injectables,
lyophilized and antibiotic products for
hospitals worldwide.

Universalizing
Science
That **Matters**

Universalizing Science That Matters

We succeed when we improve people's lives.

We transform the present and future of health.

We unleash access to better health.

01 Company overview

Who we are

Reig Jofre is an independent European pharmaceutical company founded in 1929.

We research, develop, manufacture and commercialize essential products for people's lives. From prevention and well-being to critical hospital care — we universalize science that matters.

Innovation

Industrial Capacity

Innovation

A key player in the Global Innovation Ecosystem

More than 1.300 people

- Across 4 production centers in EU
- 8 subsidiaries in the world
- Presence in more than 70 countries

Since 1929

We research, develop, manufacture & commercialize a diversified product portfolio essential

International sales reached 59% of total revenue

70+
Countries

2024 figures

02 Global presence & industrial footprint

International presence

Reig Jofre operates in more **than 70** countries through **8 subsidiaries across Europe** – Spain, Portugal, France, UK, Belgium, Poland, Sweden, and the Czech Republic.

In 2024, international sales represented **59% of total revenues**, growing **+13%** vs. 2023, driven mainly by expansion in Europe (+16%) and new operations in Central Europe.

By region without Spain sales were distributed as follows: **Europe 48%, Asia 7%, America 2%, and Africa 2%**, reflecting the company's global and diversified footprint.

Reig Jofre's industrial network combines nearly a century of pharmaceutical expertise with advanced European technology.

The company operates four specialized manufacturing sites that ensure quality, innovation, and strategic autonomy within the European health industry:

Barcelona (Spain)

Headquarters and main development and production center for injectables, lyophilized products and biotech services, including vaccine manufacturing.

Toledo (Spain)

Two plants dedicated to beta-lactam antibiotics (penicillin and cephalosporins) in sterile vial facilities, with a European distribution hub.

Malmö (Sweden)

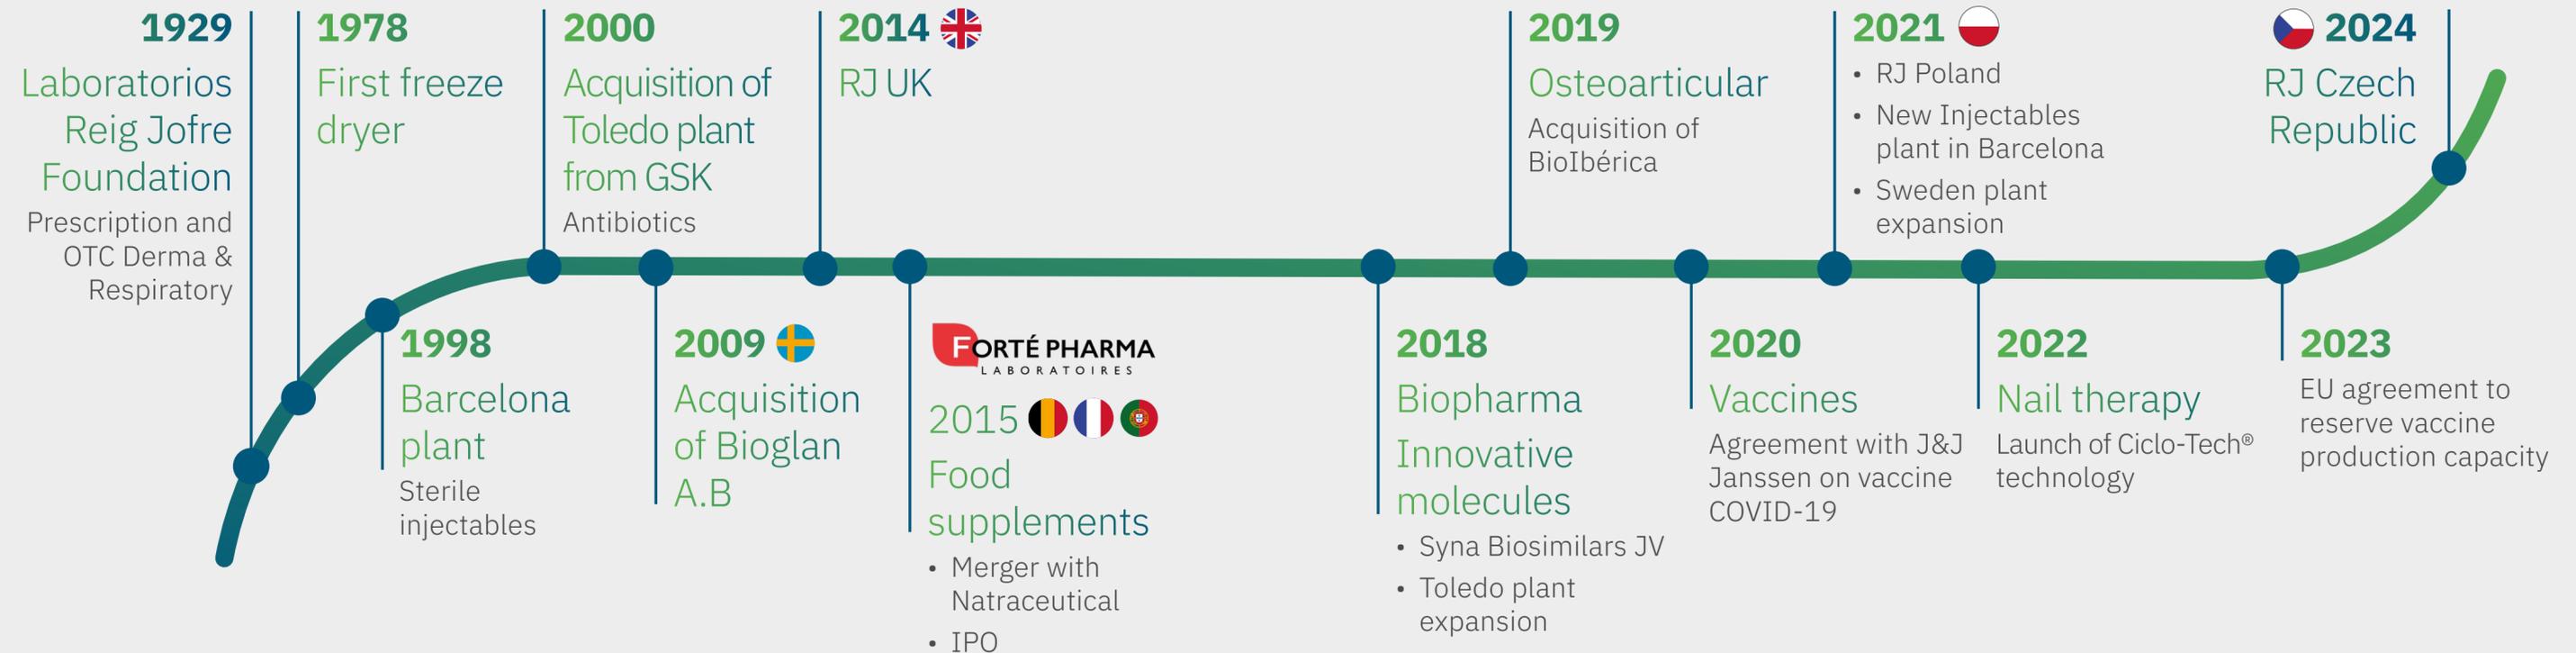

Specializes in semi-solids, topical formulations and enteral gels, offering advanced dermatological and hospital-use products.

Madrid (Spain)

International Business headquarters, coordinating commercial operations and partnerships across more than 70 countries.

03 Past & present

04 Pharmaceutical technologies

Who We Are

The **Pharmaceutical Technologies division** develops and manufactures **sterile injectables, lyophilized products and beta-lactam antibiotics** for hospital and contract use (CDMO).

With more than **95 years of know-how**, we are a **trusted partner in European manufacturing excellence**, combining industrial innovation, quality and **reliability** to serve hospitals and healthcare companies worldwide.

Key figures 2024

€151.3 M in sales (+9 % vs 2023)

63 % international sales (mainly Europe +28 %)

45 % of Reig Jofre total revenues

+54 % growth in Asia driven by hospital and CDMO demand

We aim To be a global leader in hospital pharmaceutical solutions, essential for all driven by our specialized technology, industrial capacity, innovation and a dedicated team committed to exceeding customer service.

Past

Present

Where We Were Born to Respond

Reig Jofre was born in the hospital, in places where time is precious and trust is everything. Our roots in injectables and anti-infectives reflect a deep tradition of innovation, built on decades of expertise. We've evolved through continuous innovation, driven by technical excellence and a deep commitment to supporting healthcare professionals in their most critical moments.

Where We Expand Our Impact

Today, our expertise allows us to go further: expanding our impact in areas where our knowledge, technology, and experience truly make a difference. We innovate with purpose.

- **Critical care & Infectious Diseases:** Where it all began. We are the trusted partner, delivering essential therapies for life-threatening conditions.
- **Neuroscience:** We improve lives today and innovate for tomorrow, developing advanced treatments for neurological disorders.
- **Rare diseases & Immunology:** We respond to complexity with precision, offering meaningful solutions for patients with unique clinical needs.

Innovation

RJ PhT relies on know-how & advanced technology, built over 95 years, to lead the pharmaceutical industry transformation

Experts in lyophilized, injectables & antibiotics, advancing into new biotechnological solutions

Global

Manufactured in Europe for the whole world, growing in innovation, sustainability and driving results

Experts in lyophilized, injectables & antibiotics, advancing into new biotechnological solutions

Committed

To Customer Service Excellence through the optimization of productivity and quality in our sites (EU FAB)

Quality excellence in every step

05 Product portfolio

Top 10 Products

Sodium Oxybate 500 mg/ml

Oral solution

Remifentanil 1 mg, 2 mg

3 ml lyophilized vial for injection

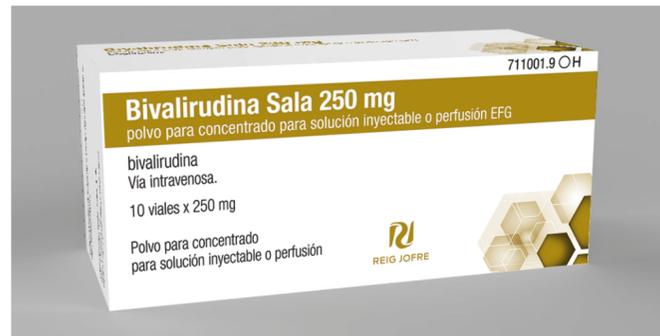

Remifentanil 5 mg

6 ml lyophilized vial for injection

Bivalirudin 250 mg

10 ml lyophilized vial for injection

Benzathine Benzylpenicillin 0.6 M.I.U.

10 ml vial for injection

Benzathine Benzylpenicillin 1.2 M.I.U.

10 ml vial for injection

Benzathine Benzylpenicillin 2.4 M.I.U.

10 ml vial for injection

Piperacillin / Tazobactam 2,25 g

20 ml perfusion vial

Piperacillin / Tazobactam 4,5g

50 ml perfusion vial

Heparin 1.000 UI/ml, 5 ml

8 ml vial for injection

Heparin 5.000 UI/ml, 5 ml

8 ml vial for injection

Daptomycin 350 mg, 500 mg

20 ml lyophilized vial for injection

Ganciclovir 500 mg

10 ml lyophilized vial for injection

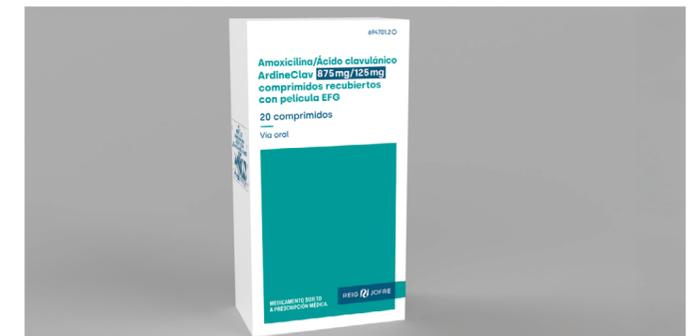

Co-amoxiclav 500 mg / 125 mg

Tablets

Co-amoxiclav 875 mg / 125mg

Sachets and tablets

Co-amoxiclav 1 g / 200mg

20 ml vial for injection

Co-amoxiclav 2 g / 200mg

20 ml perfusion vial
